Hockey

Mindfulness

Minimalism

Onewheeling

SCUBA

Snowboarding

## Objective

I'm passionate about writing high quality software. That's why I'm a strong proponent of Test Driven Development and pair programming. I'm always pushing to foster great teamwork by building trust through vulnerability. I've done this as both a team member and as a team leader. I believe that both quality software and strong teams are foundational to creating amazing products and companies.

## Experience

**Apple** Software Engineer Cupertino CA, Jan 2017 - Present

At Apple I work on Photos for iOS and MacOS. As part of the Core UI team I help create the UI components used throughout the Photos app. I also help to develop the UI of new features. For iOS 12 I lead the development of the new Albums tab.

*iOS - Photos - Apple*

**Sigmend** CTO / Founder Boulder CO, Jan 2016 - Oct 2016

Our startup went through Techstars Boulder 2016. Sigmend analyzes, tracks, and improves employee sentiment. We built a Slack bot and various APIs using NodeJS. Handled planning, developing, deploying, and managing the Sigmend software. As a co-founder I was also involved in everything from user studies to meeting with and pitching to investors. Checkout our Demo Day pitch: ([luna.lu/demoday](http://luna.lu/demoday)).

*Contact: Natty Zola (303) 919-6263*

**Inspirato** Lead iOS Developer Denver CO, Feb 2015 - Jan 2016

Oversaw transition of development on iPhone/iPad app from 3rd party consultancy to internal development team. Implemented development standards and practices for our iOS team, including code architectures, git workflows, development workflows, code reviews, and automated deployments. Helped in hiring and training, growing to a team of 4 developers in one year.

*Contact: Adam Bauman (720) 201-9547*

**ShowMobile** Lead iOS Developer Denver CO, May 2014 - Feb 2015

Handled all aspects of development of ShowMobile's iOS app. Worked on a team that practiced TDD and pair programming.

*Contact: Tom Padula (720) 583-0318*

**IconPulse** CTO / Founder Boulder CO, Jan 2014 - May 2014

Using data from various social media sources we ranked athletes on their social presence and influence. Wrote algorithms to match athlete profiles from ESPN's API to the correct user on social media platforms. Developed the Ruby on Rails backend and web-app as well as a prototype iOS client.

*Contact: Seth Williams (406) 570-2100*

**Deliverss** CTO / Founder Boulder CO, 2010 - 2011

Lead team of three developers implementing a news aggregator web application. Built using Django. Presented at Boulder Beta alongside Sphero.

*Contact: Zack Shapiro (443) 610-3402*

## Education

**BS** in Computer Science 2009 - 2014

The University of Colorado, Boulder

**BA** in Biochemistry 2009 - 2014

The University of Colorado, Boulder
